

## Load 'n' Lock Top® - Engineered Better Bag Filling Better Filling and Stability While Gaining Fill Efficiency

### Load 'n' Lock Top®:

Instead of only offering a low price, AmeriGlobe's systematic approach allows us to engineer savings throughout the bag's lifecycle. Load 'n' Lock Top® allows for a better filled package. It also allows you to reduce the bag height for the same fill weight or increase the fill weight without increasing the bag height.

Contact AmeriGlobe today so we can work to find the best solutions for you.

### Stability at a Lower Cost

The Load 'n' Lock Top® can reduce the height of most bags by 6" to 12", saving you money. Our innovation creates more volume above the bag, allowing for the cone that naturally forms during bag filling. In addition, the "lock" feature secures the top of the bag, reducing overall bag height, securing the product against leaning, and tightening the overall package. Instead of paying for a portion of the bag that remains unfilled, paying for truck/container bracing, or paying for unused container weight, we create a bag that best maximizes the value of your packaging dollar.

### Benefits

- Improved Package Efficiency
- Easier Filling
- Increased Stability
- Improved Arrival Condition
- More Attractive
- Reduced Need for Bracing
- Reduced Freight Damage
- No Impact on End-User

AmeriGlobe is not a bulk bag broker that offers no support. We are the largest bulk bag manufacturer in the United States. Our combination of US production and managed overseas production gives you safe, competitive pricing, while we work with you to show huge freight cost and system based savings.
