

## 'Perma' Liner® - Engineered Secure Attachment Protection and cleanliness of a liner without fill and discharge issues

### 'Perma' Liner®:

Instead of only offering a low price, AmeriGlobe's systematic approach allows us to engineer savings by eliminating many systemic costs. These savings can include the cost of the labor you spend fighting the liner's restriction of incoming product or the cost created by liner extension into your customer's receiving equipment.

Contact AmeriGlobe today so we can work to find the best solutions for you.

### Protection of Liners Without the Hassles of Liner

Unsecured liners are pulled down by the product flow, reducing the bag's capacity, increasing the package cost, and reducing the bag's stability. In addition, since the loose liner prevents the bag from filling completely, the excess bag gives the product room to move, frequently making the bag slump or lean.

When the end-user tries to empty the bag, the liner can extend into the receiving equipment. This can result in damage to the liner, which becomes contamination, or downtime with the discharging equipment.

Some of the most significant cost savings come from preventing end-user complaints and claims. For example, if your bags have unattached liners, your customers may have preventable liner issues that we can solve for you and your customer.

AmeriGlobe is not a bulk bag broker that offers no support. We are the largest bulk bag manufacturer in the United States. Our combination of US production and managed overseas production gives you safe, competitive pricing, while we work with you to show huge freight cost and system based savings.

### Benefits

- Standard Liner Acts as Form Fit Liner
- Reduced End-User Complaints
- Reduced Contamination
- Better Filling
- Easier Discharging
- Increased Stability
- More Attractive
- Positive Impact on End-User
