

## Systems Review - Engineered System Savings

We Review Your System to Leverage Our Knowledge for Significant Savings

### Systems Review

Since most customers and vendors view bulk bags as commodity items, savings have traditionally been limited to unit cost savings. AmeriGlobe's experience and innovative culture allow us to generate savings beyond the cost of the bag. Does it make sense to limit your savings to unit costs when there are larger alternatives?

Contact AmeriGlobe today so we can work to find the best solutions for you.

### Cost Reduction Through Systemic Understanding

Most bag users and sellers view bulk bags as commodity items. If your product is a commodity, your filling, warehousing, shipping, and end-users are all exactly the same as your competitors, then maybe it would be true. However, your needs and your products' needs are unique, therefore your bag design should reflect that.

By understanding your filling, warehousing, and shipping needs, we can find ways to reduce your overall costs. Given all of the costs related to using bulk bags, is it unreasonable to think that the right package can reduce overall costs enough to pay for itself?

AmeriGlobe is not a bulk bag broker that offers no support. We are the largest bulk bag manufacturer in the United States. Our combination of US production and managed overseas production gives you safe, competitive pricing, while we work with you to show huge freight cost and system based savings.

### Benefits

- Lower Total Costs
- Reduce Filling Labor Costs
- Reduced Freight Costs
- Reduced Warehouse Costs
- Increased Stability
- Reduced Contamination
- Improved Arrival Condition
- Reduced Transit Damage
- More Attractive Packaging
