

# Lowering Costs Through Unique Solutions

## AMERIGLOBE

### Bag Refurbishing

Are you tired of throwing away your bags? AmeriGlobe offers a safe, environmentally friendly alternative. Our trained technicians will inspect your bags to make sure they are safe for reuse. We will safely repair certain types of bag damage. Our custom tracking software will automatically reject bags that do not meet specified safety criteria. If we find a bag that is too damaged, too old, or has been through too many trips, we will recycle it back into resin. This final act ends any liability you may have for that particular bag. All of this for less than the cost of a new bag.

We offer two types of cleaning options. First, we have a dry cleaning system that uses airflow and a quickly rotating brush to clean the bag. Second, we offer a wet wash system with food grade cleaning solutions.

- Reduced landfill costs
- Reduced bag costs
- Reduced disposal liability
- Reduced environmental impact

Most companies claim to offer better bag prices. AmeriGlobe's systematic approach lets us find ways to save you money. If you think bag refurbishing may be right for you, call AmeriGlobe today.
