

Lowering Costs Through Unique Solutions

AMERI GLOBE

Ex-Pallet & MegaBase®

Designed to work perfectly with the MegaBase® bag, this product is not only easy to use, it will save your company money. There is no need for the expense of hardwood pallets, heating or fumigation of pallets. The Ex-Pallet gives you the flexibility to have a palletless bag when needed without having to decide in advance. Use a wood pallet when you need or the Ex-Pallet, your choice at the time of packaging or any time after.

Traditional bags round out and hang over the square base which creates instability. We minimize this effect with the patent pending MegaBase® bag. This design gains an incredible level of stability by expanding the base of the bag by several hundred cubic inches versus the traditional square base. The larger base means there is less unsupported product, improving the safety and performance of the bag. In fact, the MegaBase® bag is so stable that in many cases it can be used to replace more expensive baffle bags.

The combination of the Ex-Pallet and the MegaBase® bag gives you significant profit improvement with an implementation that seems effortless.
